Dear hiring manager,

My name is Thea and I'm a registered nurse transitioning into the tech field. I am currently studying Frontend Development at Noroff, and I'm looking for an environment where I can continue to grow and develop as a developer. I am motivated to contribute, learn and take on new challenges where I can apply and expand my skills.

I have experience with HTML, CSS and JavaScript and I have completed several projects using these technologies. Throughout my studies and previous work, I have also used Figma, GitHub, Git and VS Code, and I feel confident working with these tools.

In most of my projects I have started from scratch making wireframes and high-fidelity prototypes in Figma. This allows me to explore my creative side and plan each project thoroughly, ensuring that I have a clear direction once development begins. I'm highly organized and I use GitHub project boards to structure my workflow. When coding, I strive to achieve the best possible result, and I'm always eager to learn new techniques and apply them to make my projects stand out.

I am now seeking opportunities where I can continue developing my skills, contribute to meaningful work and grow as a frontend developer. I would greatly appreciate the chance to discuss how I can be a positive addition to your team.

Thank you for considering my application. I look forward to the possibility of discussing my qualifications with you in an interview.

Best regards,

Thea Nordhøy Kristensen
